

THE RESULTS ARE FINALLY IN

Our 43rd year comes to a close and it's time to report on actual numbers of teams and students reporting scores. In a 'post-pandemic' year MOEMS managed to fully register (and have submitted at least some scores), 2015 Division E teams and 636 Division M teams. Those teams registered 48,726 third through sixth grade students in Division E Contests and 15,472 fourth through eighth grade students in Division M Contests. On the "down" side there were over 5400 students whose PICO's registered the teams, but never entered a score, depriving those students of the chance to score in the top 2%, top 10%, or top 50% of this group of almost 70,000.

Below are the scores that determined the bands we use to distribute reports. Institute and District teams are not included in the team results, but if you are a PICO for an Institute or District team, you could see where your team might have placed.

Included in the following reports were 256 teams (164 -Division E; 92 -Division M) that reported

only partial results. Totally eliminated from the results are the 307 (219 -Division E; 88 -Division M) teams that had no results reported.

Special recognition goes to the 340 students who attained perfect scores, accompanied by a George Lenchner Award. There were also 431 mathletes that missed that perfect score by only one point, a very impressive score at this level of competition.

As we move forward to what we hope will be the best year ever for our school children and teachers, we wish everyone involved with MOEMS® Contests and Tournaments a wonderful, fun-filled, and renewing summer.

It has been my joy to serve as Executive Director for the past twelve years doing a job that I could have only dreamed possible back in 2010. In all likelihood, my tenure as “the boss” will come to an end on June 30th. I’ll still be around to help in the transition to new leadership at MOEMS®. Stay in touch with Facebook (www.facebook.com/njrestivo) if you are so inclined; I’d love to hear your school stories, successes, and challenges.
